#### Croppings of Mining News Assembled From Various Sources.

THE CUMBERLAND SMELTER

About the Rich Mineral Producers of the Cour d'Alenes-Opai Mining in

J. R. King of Castle arrived in Helena Monday, says the Journal, and reports that the Cumberland smelter was blown in on Thursday last, everything working smoothly and to the satisfaction of all. On Friday the smelter was producing a ton of bullion per hour. Ore in abundance, plenty of fuel on hand and in sight the run is expected to indefinitely continue and the fact demonstrated that the Cumberland is the greatest lead-silver fissure vein ever opened in the United States. On yesterday evening a special telegram was received giving information that the smeder was still running satisfactorily, producing upwards of twenty-five tons of builion each twentyfour hours, which output would soon be increased to thirty-five tons. For a single stock smelter this result cannot be paralleled, it will prove a veritable record breaker. With the Cumberland smelter in operation, reducing seventy to one hundred tons of ore per day, the future of Castle should be pleased beyond doubt. The first direct effect will be a substantial pay roll, not only involving the men engaged in producing the ore in the mine, reducing it at the smelter and the freighters engaged in hauling away the bultion and bringing in supplies, but the Cumberland company, owner of other valuable properties, will put on development forces, largely increasing the number of miners actively engaged at fair round wages; further still will the effect be felt, the commencement and successful operation of the Cumberland smelter, of which there can be no doubt, will give courage to the individuals and companies owning other properties in the camp, and developments will be pushed, giving employment to many miners; buildings must be erected to accommodate them, giving employ-ment to laborers and artisans, all bringing into circulation money which inevita-

bly results in prosperity and growth. The starting of the Cumberland smelter upon which no expense has been spared either in the way of experiment ascertain the best adapted process or in the erection of the plant for the best and most economical working of the ore.

From the Mullan Tribune.

A. M. Strode spent several days at Osburn this week inspecting the mining claims in which he is interested at that place. On the War Eagle, where Superinendent Jennings is now at work with a force of men, a splendid showing of ore presents itself. The vein is four and onepresents itself. The vein is four and one-half feet wide, and streaks of galena and copper are found running—through—it in many places. Superintendent Jennings is very much elated over the showing and will drive ahead as fast as with men and powder he possibly can. The Cocur d'Alene and Spokane Mining company, a stock concern, now own six claims, and have them stocked for \$600,000. The War Eagle is the only claim upon which work to any extent is being done.

The Hunter is shipping four cars of concentrates per day over the Northern Pacific to the Portland smelter. General Manager Benjamin Cox is expected back from St. Paul this week, when the men are to be paid off in full to May 1, including the amounts tied up in the Waliace

The You Like people have discontinued the sacking of their ore, and are now prepared to begin shipping in bulk. the dump are several thousand tons of excellent ore ready for smelting, but as the company expects to ship to the Spokane smelting works when completed, it may be a few weeks before any more of their ore is sent down from Chloride hill. At present the showing at the You Like consists of over four feet of very clear shipping ore. Not bad for eight months

One of the most promising strikes ever made in the Cocur d'Alenes in recent times was made on the Killbuck, at the ad of Lake guich, about two miles east of the town of Osburn, during the past week. The George brothers, Lee and Will, of Osburn, and a capitalist of Portland are the owners of the Killbuck, and already they have been offered a fair bonding price on it, but very sensibly refused the offer. All the work they are now doing upon it counts, and about eight or ten sacks of ore of a very rich character are being taken from it daily. Considerable ore has been shipped from the Kilibuck in the past by Mr. Cox, who had a contract to run several thousand feet for the ore he found. Mr. Cox, becoming blind about 18 months ago, work was suspended and it was not until two weeks ago that work was again taken up, with the most encouraging result.

The hills along the South Fork are lit-The limits along the South Fork are litterally covered with prospectors from Wardner to Mullan. The Coeur d'Alene is the richest mining country in the world, and is the best prospecting fleid south of the North Pole, and don't let that fact escape your memory, either.

### About Bocky Bar

Special Correspondence of the Standard, ROCKY BAR Idaho, May 25 - Things in mining circles are growing brighter every day. Last winter it looked as though Rocky Bar was going to have a long hard puli; however, a change has come. The Elmore Gold Mining company has 50 men steadily employed and it is probable will increase the force very soon. This company is interested in and is operating the Vishnu, which is showing well at present. The Vishnu has a gold quartz vein of three feet. The hanging and tootwalls so far are very regular. Judging from the old workings, indications are very good, and proper development under the present management will no doubt richly reward the company's efforts. Two other veins not worked at present were struck not long ago in running the 675-foot crosscut. These three veins are on the 175-foot level. Sufficient ore is being taken out to keep 20 stamps dropping. The ore is running very satisfactorily.

George A. McCornick, superintendent, and Finn Donovan, foreman, when seen, said: The outlook was very promising

The Ophir, so far, has had nothing done

but development work. About 20 men are employed at present, and more may be

put on soon.

The Jumbo is a new prospect about 30 miles from here that has recently come into prominence. It is a vein of 18 feet on the croppings. A shaft is sunk 50 feet. The ore assays \$200 per ton.

The great saie of the Atlanta mining

property has no doubt been consum-mated. The proper transfer has been made and duly recorded. The consider-ation was \$3,700,000. This scores another victory for Col. V. S. Anderson, who has negotiated many other important sales as

Dredging for Gold. The great scheme inaugurated by a Colorado company of men to dredge the Missouri for gold at Three Forks is successfully under way, says the Inter Mountain. The boat was launched recently. Her weight as she went into the water was a little over 200 tons. The other boat which carries the amaigamat-ors is now in the docks and about ready to be launched, The small coal tender boat has been built and the small passenger boat is also completed. The dimensions of the dredge are 93 feet long by 32 feet wide. The amaigamator boat is 31 by 18 feet. It is allowed that four tons of coal will be used a day and the coal boat is built to carry four tons with ease. The machinery on the dredge is very beavy, weighing 111 tons. It was designed to have the large boats fin ished carrier, but there was a delay in getting large timbers which had to be brought from Misssula county, some being 49 foot long and 18 inches square. About 150,000 feet of lumber has been used in constructing these

Opal Mining.

During the past year opal mining in some parts of Idaho has developed to a wonderful extent. The first opals were found about two years ago near Moscow, and were pronounced by d fferent author ities on precious stones to exceed in brilliancy and hardness the opals found in Mexico, and to be nearly as valuable as oriental gems.

A recent issue of the Idaho Star says: "Opal mining is in full progress. Several fine stones are being taken out every day. E. C. Hail's men found seven cight Tuesday which weighed 70 karats, valued at \$10 a karat. Two of them, though, are of much better quality than the the others, being the genuine fire opal. The ones of best quality are usually small, though their values often

#### New Companies.

The Snow Creek Mining and Townsite company was incorporated Monday by H. O. Chowen, F. B. Wilcox, Phil Gibson, J. A. Bush, F. W. Webster, A. W. Kings-bury, J. H. McKnight, John Ronnox and J. M. Burlingame, jr. The capital stock is \$1,000,000, divided into 1,000,000 sbares. The principal office will be at Great

Articles of incorporation of the Livingston and Boulder Mining company have been filed. The object of the company is to carry on a business of prospecting, locating, buying and selling mines and min-ing for gold, silver, iron, copper, coal and other precious metals. The princi-pal place of business is to be Livingston, Montana. Capital stock, \$390,000 divided into 300,000 shares of a par value of \$1

### STOCKS AND BONDS.

Up and Downs in Market Values on the Stock Exchange.

NEW YORK, May 26.—The stock market to-day, outside of transactions in less than haif a dozen stocks, was duil and utterly devoid of feature. The market closed heavy, at an improvement over the lowest prices established in the afternoon The final changes were insignificant.

KILLED HIS BOSOM FRIEND

Suicide of a Washington Woman-A Cowboy Shot and Killed-An Idaho Young Lady and Her Piano.

The Indians at the Warm Springs agency have ordered a monument, to cost about \$75, to be placed over the remains of their dead chief, William Chinook.

A bachelor friend of ours purchased 11 bens and a rooster a few days since and the first day gathered 12 eggs. He is somewhat mystified over the matter.—

One of our exchanges has this advertisement: "For sale. A piano by a lady about to travel in an oak case with carved We hope this lady won't strike Blackfoot on a windy day.-Blackfoot (Idaho) News.

P. H. Trudell of South Bend, Wash. while unpacking a bunch of banannas came across a large scorpion that had secreted uself and had been transported from the tropics. The spi promptly killed by Mr. Trudell. spider was

The city council of Palouse, Wash., is pretty hard on boys under 18 years of age. It prohibits them from being on the streets after 8 o'clock at night; also an ordinance making it an offense to ride bicycles on the sidewalks and punishable by a fine of \$25. The youngsters are raising a big how about both acts.

The body of a dead woman was found mile below Colfax, Wash, Saturday, by a farmer. It was lying in a small tent and by its side was an empty bottle which had contained laudanum. The coroner' jury failed to identify it and returned a vertict of suicide by poison.

Jack Harris and two companions, Wyo ming cowboys, left Buffalo one day last week for their camp, carrying a heavier oad of whiskey than they could safely handle, says the Billings Gazette. A few miles out of town they began throwing up their bats and shooting at them. One bullet took effect in Harris' head, killing him instantly. The coroner's jury brought in a verdict of criminal carelessness.

Walter Turner, a young Quinauit Lake, Wash., settler, shot and killed Cufton Kinkle, his bosom friend, mistaking him for a wild beast. Kinkle awoke in the middle of the night and having occasion to go outside the cabin, did so very quietly, so as not to awaken his friend. The cracking of twigs outside the cabin, however, awoke Turner. They had sh car the day before and Turner, thinking it was another wild animal prowling bout the cabin, raised his rifle and taking aim at the dark form which he could ee through the cracks in the cabin, fired. Kinkle's dying yell was the first intima-tion Turner had of his friend's absence from the bed, so excited had he been. Both men were "tenderfeet," Kinkle becently from Etizabeth, N. J., and Turner from Minneapolis.

FIVE MEALS FOR A DOLLAR. The Spokane Excursionists Dined Economically at Wallace.

From the Mullan Tribune. The special excursion train over the Union Pacific road on Thursday carried about 400 of Spokane's population, fully half of whom were mining experts from that thriving Palouse town. Starting at about 8 a. m., the train sped along and kept to the track all the way to Tekoa. The train stopped here and the cargo of human beings got off, shiffed the air in a knowing way, remarked that there was plenty of room for improvement in Tekoa got on the train and rode on their way rejoicing. The train again kept strictly to the rails, and after an uneventful ride among "gently undulating hills," si-washes, etc., finally arrived at the head of Cocur d'Alene take and found it still there. So was the river. The banks were fresh and green, as were a large number of the excursionists. After an other and longer run, the train again keeping to the rails, the party reached Wardner, where, as a Spokane reporter soberly writes, that he and a number of others walked over the very ground that another jackass, owned by Phil O'Rourke, walked over on his prospecting trip when the famous Bunker Hill mines were dis-

The same reporter, who claims to have stood where the other jackass stood, in speaking of the Wardner mines, says that he saw the product of these mines converted into bullion while standing in the spot where stood his predecessor, the above mentioned jackass. He also saw that which no other eye hath seen, viz., the electric drills at work and the electric fluid running over 20 miles of wire stretched on the Wardner hills. He is evidently a prevarieator, for there are no electric drills at Wardner, nor are there 20 miles of wire, including other lines, in the entire town of Wardner, But we must not spend too much time at the spot made famous by the ass-and the reporter -and the experts-but will move along to Wailace, where a pientiful supply of duck soup and cold shoulder awaited the pic-nickers.

We may remark right here that the outfit made several "bulls" while endeavoring to make themselves more solid with the business men of this country, but their first and most grievous mistake was the sending out of an advance agent to cut the rates for their only meal to be eaten in the Coeur d'Alene country. The people of Wallace, anxious to do all in their power to make the excursion a suc-cess and contribute to the enjoyment of their guests, had raised a purse among the enterprising business men wherewith to pay all the expenses of the excursionists, as to eating, drinking, etc., and to that end sent word to all the eating houses, hotels and saloons in the town requesting the proprietors thereof not to accept any pay from persons holding excursion tickets, but to refer their bills to the committee after the visitors left. Besides this the Wallace brass band had been hired for the occasion and was to meet the excursion train at the depot and in company with the committee escort the visitors all over the town, and to the various points of interest in the neighborhood.

But the advance agent loomed up a day or so ahead and asked for the regular rates accorded theatrical troupes. The good people of Wallace felt hurt, nor can they be blamed for exhibiting their feelings as they did, very much to the annoy-

ance of the cheap rate visitors. Of course the hotel men refused to treat with the advance agent as to his proposition of a half rate for Spokaneites, and in consequence the advance man, through the Spokane papers, advised those intending to indulge in grub while away from home to bring it with them. Many, however, failed to provide themselves with the lunch, and were compelled to pay as high as 25 and even fifty cents for their din-

The Wallace people paid absolutely no attention to the visitors, who were left to roam the town like stray sheep. A representative of the Crazy Horse hotel did come down to the train with a flag in one hand and a banner in the other, and on the latter was the electri ying announcement that the Crazy Horse, the only second class hotel in Wallace, would feed five for \$1.00. To see the way those excursionists flocked around the standard bearer was a caution. The Crazy Horse and "Denver Shorty" caught nearly the whole train-load.

A few of the party went to the Carter House and the Idaho and after eating a hearty meal made a great roar against paying 50 and 75 cents.

The Spokane business men can feel satisfied that they created an impression in the Coeur d'Alene, but it was not the kind they wished to create.
